

Server Client Chat Program:

- To run, open one terminal and run the MyServer class file to turn on server
- Next, open two or more terminals and run MyClient class file and pick username
- To broadcast a message to all users just type from one of the chats
- To send a private message, type `"/pm username text"` where username is the user you want to send the pm to and text is the actual message
- Type exit from the client to disconnect
